## & Storage Rack

**Clean up on the competition with these new additions to the PRO® Line. The PC-10 Cube, RC-4 Rack and B-35 Faucet are the key to a cleaner, safer and more productive work area.**

### Easy To Use

Your customers will appreciate the user friendly design of our new U.N. approved 5-gallon containers. Complete with handle and air release, the PC-10 pours with the ease of a one gallon jug. Screw in the optional B-35 3/4" Faucet to easily dispense concentrates directly from the cube into buckets or spray bottles. It is designed to sit on its side on a workbench or shelf. The labels are affixed to the container upsidedown so when you set the product on its side for dispensing, the label is facing up and is easily readable. These durable, reusable containers are now our standard 5-gallon shipping containers for all PRO® waterbase products\*. It is available for purchase separately as well.

### Easy Shipping and Storage

The PC-10 container is more than handy. Its durable HDPE material and cube shape make it ideal for shipping and storage. Designed with grooves and ridges on both the top and bottom, it stacks easily and safely, yielding more space for product in warehouses and trucks.

\*Some PRO® Products cannot be packaged in the U.N. Cubes. The following products will continue to be packaged in their existing containers: C-10-5, C-16-5, C-61-5, C-66-5, S-87-5, S-88-5, S-94-5 and 4711-5.

### Cut Down on Clutter

For end user storage, we offer a handy rack designed especially for the PC-10 Cube. The RC-4 Storage Rack fits four cubes and takes up very little space. Your customers will love this rack in conjunction with the cube and the B-35 Faucet. It makes dilution of concentrates and dispensing ready to use product so much easier. The rack is ready for immediate shipment.

### Strategic Marketing

Promote the use of the complete U.N. Cube and Rack system to increase sales of your PRO® waterbase products. If you market it right, you can sell four cube products just to get your customers started. Place the rack in their shop at no charge on the condition that they use only PRO® Cube products in the rack. If they buy from someone else or they discontinue use, take it back or bill them for the rack.

### Customer Satisfaction

You could include the rack at a discount or offer it free when customers purchase 4 cube products (e.g. "Buy 4 five-gallon cube products, get the rack at 50% off or free!"). This type of value added service can produce a long term relationship that the customers will honor because of the convenience you have provided for them. Put a package together and offer it to your high end users.
