- Use on Undercarriage, Frames, Rocker Panels, Fender Wells, Firewalls & Hood

AUC-201 AEROSOL UNDERCOATING

FEATURES AND BENEFITS

PRO®'s newly reformulated AUC-201 is the clean and easy way to apply undercoating. Because it is an aerosol can, there is no need to use a spray gun and there is more control during application. AUC-201 is a sound deadener and rust preventative that helps eliminate road noises when sprayed on the underbody and carriage. Unlike other undercoatings, AUC-201 will not run, sag or pinhole during normal application. Rust proofs and stops corrosion from the inside out. AUC-201 sprays evenly, easily and dries quickly, leaving a powerful film that is exceptionally resistant to abrasion and low temperatures. AUC-201's high grade formula is rubberized, so it is paintable.

Every can empties completely - good to the last drop!

RECOMMENDED FOR

AUC-201 has become a favorite of body shops and used car lots. It is perfect for retouching after body work. Use to touch-up and protect frames, rocker panels, fender wells, firewalls, hoods and gas tanks. Also, use AUC-201 to close seams, as a chip guard, hide rust, reduce road noise and waterproof the vehicle.

APPLICATION

Make sure all areas to be treated are clean and dry prior to application. For

best results, spray at room temperature, not below 70 degrees. Shake can until mixing ball moves freely. Continue to shake can for a full minute. Hold can 8 to 10 inches from surface to be sprayed. Spray with a stroking motion. When dry, AUC-201 stays pliable to prevent chipping, cracking or peeling. Coating air dries in about 2 hours.

SPECIAL NOTES

Remove any overspray of undercoating with C-16 POWER-SOL™, C-61 Pro®-Sol™, C-62 Cal-Solv™.

PACKAGING

20 OZ. CAN/12 PER CASE
