BURFORD'S® AEROSOL ENGINE PAINTS

FEATURES AND BENEFITS

Burford's® the originator of engine paint, is a favorite with the professional who takes pride in his work. Burford's® has a complete line of durable, heat resistant (over 500 degrees) aerosol engine paints designed to restore the original factory appearance to all faded engines. Burford's® Engine Paints cover well with excellent adhesion due to the pin point spray pattern. These fast drying, long lasting enamels are available in five (5) factory matched colors. Burford's® Engine Paints are gasoline and oil resistant which are the reasons they retain the high gloss film long after other paints have faded and peeled. Designed for quick and easy use, Burford's® Engine Paints are packed in high speed, self spraying cans with non-clogging tips.

RECOMMENDED FOR

Burford's® Engine Paints pin point spray pattern allows for easy perfect touch up without excessive over spray or entire refinishing of all faded engines for autos, trucks, marine, aviation and industrial equipment. Safe on all pre-cleaned metal surfaces.

SPECIAL NOTES

For best results, use product at room temperature, not below 70 degrees. Burford's® Engine Paints contain no methylene chloride.

PACKAGING

16 OZ. CAN/12 PER CASE

APPLICATION

Shake can until mixing ball moves freely. Continue to shake for a full minute. Hold can 6 to 10 inches from surface. Spray with stroking motion. Apply uniform light coats. Two thin coats are better than one heavy application. Position the push button opening with the black dot to completely empty contents of can. After use, hold can upside down and press button to clear tip for future use.
