- **VOC Compliant**

C-30

WATER SPOT REMOVER

FEATURES AND BENEFITS

Easy to use liquid removes water spots, etching & pitting from glass, chrome and stainless steel surfaces with very little effort. Mild acid formula breaks the bond between mineral deposits and the substrate. Leaves the surface free of deposits while restoring the optical clarity of glass and other surfaces.

RECOMMENDED FOR

Removing water spots, etching and pitting from glass, chrome and stainless steel surfaces. Restores optical clarity to glass and other water stained or damaged surfaces. Ideal for automotive, industrial and janitorial applications. Also great for shower stalls, window washers, glass & windshield companies, glass car wash view windows & storm/tunnel doors, boats, ships, marinas and anywhere glass is exposed to water.

APPLICATION

Directions: Shake well before using. For your protection, safety glasses and acid proof gloves are recommended while using this product. **Do not apply to hot surface or let dry on surface. Have rinse water close at hand.** Avoid contact with the painted vehicle finish and surrounding plastic trim. Apply sparingly with a sponge to small area of surface (3' x 3'). Clean one window or section at a time. For a windshield, apply to passenger side half first, let sit 30 seconds, rinse and inspect before applying to driver's side half. Spread evenly, using an up and down motion (↑↓). Do not use a circular motion. Keep confined to affected surface. Do not let product run onto trim or other areas. Allow to sit for 30 seconds. Rinse treated area thoroughly with water. Flush all surrounding areas with water as well. Afterward, wash treated area with

C-60 Super Car Wash to neutralize any remaining Water Spot Remover. Wipe with clean, dry toweling and inspect area to ensure water spots have been removed. Repeat as necessary. For added protection & shine, follow with PRO® C-27-Q Glass Polish.

SPECIAL NOTES

Not for use on coated or tinted glass, mirrors or other specially treated surfaces. Not for use on automotive paint finishes. May damage some plastic-chrome automotive trim, and plastic trim with a faux chrome vinyl finish.
