## **C-71 BUG REMOVER™**

### FEATURES AND BENEFITS

C-71 BUG REMOVER™ is a ready to use solution used for the removal of bugs, bug juice or soft tree sap laying on the surface of autos. BUG REMOVER™ contains d-Limonene citrus solvent to soften and emulsify bug kill on front fascias, grilles, hoods, windows and mirrors so bugs and residue can be easily rinsed away. This citrus base solution is strong enough for the toughest bugs, yet biodegradable and gentle on the finish. C-71 leaves a pleasant citrus fragrance.

### RECOMMENDED FOR

C-71 is designed to quickly remove bugs, bug juice or soft tree sap from grills, hoods

and windows. Recommended for autos, boats, planes, motorcycles and around the home. It will also be a welcomed addition to any car wash tunnel as a pre-soak cleaner.

### APPLICATION

Directions: Shake well before using. For your protection, safety glasses and rubber gloves are recommended while using this product. Wet surface to be cleaned with water. Spray the area with C-71 and allow to penetrate bug juice for approximately one minute. On stubborn spots, use a soft sponge to remove large bugs. Rinse clean. Wash vehicle with C-60 Super Car Wash to neutralize any material left on the finish.

### SPECIAL NOTES

Do not apply C-71 Bug Remover™ to a hot surface or let dry on surface. Do not use on freshly painted surfaces. Follow up with S-10 Bug Guard.
