- **VOC Compliant**

C-83

XTRACT POWER™

Extractor Solution & Pre-Spotter

FEATURES AND BENEFITS

This powerful stain cleaning concentrate is designed for use in soil extractor machines and pre-spotting stains on carpet, fabric and upholstery. Its unique combination of surfactants, solvents and wetting agents quickly break down and release stains so they can be easily extracted away. Cuts cleaning time considerably, especially when used with hot water extractor. The low foaming formula will not clog jets or pumps and does not require a defoamer in recovery tank. Xtract Power™ is highly concentrated and can be diluted up to 40-to-1 for economy. C-83 is a great pre-spotter on oil, protein and soil based stains. Citrus, clean, fresh fragrance is easy to work with and leaves a very pleasant aroma. Detailers can use this product to increase their capabilities and offer a more modern and efficient way of cleaning interiors. Xtract Power™ will clean, brighten and leave carpets, upholstery and fabrics with a fresh look with no stiffness or chemical residue or soap film left behind.

RECOMMENDED FOR

Use with an extractor, hot water type, is best. Deep cleaning carpets, upholstery and fabric are the primary usages for Xtract

Power™. Works great in trunk areas as well as carpeted side door panels. For use on stained areas where surface cleaning doesn't reach. Avoid using on headliners as wetting this area is not recommended. Xtract Power™ can be used with a standard recovery wand or for automobile use with any of a number of upholstery tools. Sell to the automotive, janitorial and hotel industry. Works well with cold water extractors also.

APPLICATION

Directions: Shake well before using. For your protection, safety glasses and rubber gloves are recommended while using this product. Dry brush and thoroughly vacuum area to be cleaned. **Pre-Spotting:** In a spray bottle, mix a solution of 1 part Xtract Power™ to 3 parts water. Pre-spot stained and heavily soiled areas with solution and allow to dwell 3 minutes. Use extractor to remove. Can be used with hot or cold water extractors. **Extractor Solution: (Strong Solution-20:1) Pour 6 ounces of Xtract Power™ per gallon of water** into the solution tank of the extractor. (Regular Strength Solution-40:1) Pour 4 ounces of Xtract Power™ per gallon of water into the solution tank of the extractor. Hot water works best, so allow heater to warm up solution before

use. With the pump and vacuum on, depress the trigger. Xtract Power™ solution flows through the head and onto surface, penetrating deep into stained area. Pull wand slowly over stained area where contaminants and cleaning solution are systematically removed, vacuumed back up into recovery tank. To dry the application even faster vacuum a second time with the solution trigger off. The vacuuming will pull the fibers upward so you won't have to tuft up the carpeting. After the interior has been cleaned a treatment of F-17 Smoke & Odor Eliminator will guarantee a very professional touch.

SPECIAL NOTES

Keep from freezing. Be careful not to over wet carpets or fabrics.
