- **VOC Compliant**

P-59

EXPRESSO®

Liquid Wax

FEATURES AND BENEFITS

P-59 Espresso® is a high gloss, solvent based, liquid wax designed for express detailing, new car prep, auction prep, showroom vehicles and show cars. It is designed as a two stage formula that separates into the solvent base on top and the wax, polymers and cleaning agents on the lower stage of the suspension. When shaken together, these components form a creamy purple, solution that stays together without constant shaking. This is important because it yields a more consistent mixture throughout the life of the bottle. Ultra fine powder abrasives clean and remove light oxidation & contaminants, yet has very little dust and will not scratch. The solvent base of Espresso® removes adhesives, transport tape residue, tar, road film, bee pollen and exhaust residue that is normally difficult to remove with other cleaner wax products. Natural oils provide gloss and lubricity that make for an easy break and an effortless wipe off. Imported waxes and polymers remove swirls and leaves a beautiful, high gloss shine on all automotive paint

finishes (urethanes, lacquers and enamels). Espresso®'s unique fragrance makes it easy to work with. Apply by hand or orbital buffer. We call it an express wax because it takes such a short time to apply & remove by hand. Time is money and with Espresso®, time is on your side.

RECOMMENDED FOR

Espresso® is safe for use on all types of paint finishes. It is the perfect product for express detailing, new car prep, auction prep, showroom vehicles, show cars and any vehicle that just needs a light cleaning and a great shine. Primarily designed for hand use, Espresso® can be applied by orbital buffer as well. The same great finish pops up every time.

APPLICATION

Directions: Shake well before using. For your protection, safety glasses and rubber gloves are recommended while using this product. For best results, pre-clean finishes with P-40 Duz-All® before

applying Espresso®.

Hand Use: Apply to a clean, soft, dry cloth or wax pad. Wipe product evenly over a small area of painted surface, rubbing well in a circular motion. Let dry to a haze (about 1 minute) and wipe off with a PT-8 MICROFIBER cloth. Polish by hand to a high gloss finish, turning cloth while wiping down.

Orbital or DA/ Use: Apply liquid wax to a clean orbital bonnet. Turn on machine and apply product evenly over entire painted surface with orbital buffer. Let dry to a haze (about 1 minute). Remove with a clean, dry bonnet and burnish to a high gloss finish.

SPECIAL NOTES

To minimize possibility of streaking, do not apply in direct sunlight or onto a hot surface.

PACKAGING

Gallon/4 per case
