PG-77

PRO®-GARD™

Fabric Protector

FEATURES AND BENEFITS

PG-77 PRO®-GARD™ is our popular polymer-based fabric protector. A coating that repels stains, soils, grime and eliminates static buildup on carpets, upholstery and fabrics. PRO®-Gard™ is a special blend of polymers that surrounds each individual fiber of the material with an invisible shield and protects against oil, dirt, grime and stains. Protects against spills from products such as coffee, soda, milk or similar liquids or solids. Its fast drying, non-chlorinated solvent is safe for all automotive fabrics and protects the surface without affecting the texture or flexibility of the fabric. Even when spills penetrate loose weave fabric, they are easily blotted up clean, since each fiber has already been treated.

RECOMMENDED FOR

Designed for use on all natural and synthetic fabrics to help repel water, oil, dirt, grime and stains. PRO®-Gard™ is excellent for use on all fabrics and velour seats, carpets, trunks and upholstery. Use around the auto, home, office or anywhere a fabric protector is desired.

APPLICATION

Shake well before using. For best results, the surface should be pre-cleaned with PRO® AHF-400 Fabric Cleaner, ASF-450 Super Foam Fabric Cleaner, C-49 HD Interior Cleaner or C-54 Upholstery & Carpet Cleaner prior to application. Hold can 8 to 10 inches from surface and spray using a sweeping motion. Apply in criss-cross

pattern to insure complete wetting. Allow 3 to 5 hours drying time before using vehicle. Curing is recommended before customer delivery.

SPECIAL NOTES

For aerosol application, use APG-88 Aerosol PRO®-Gard.

PACKAGING

QUART/12 PER CASE
20 OZ. CAN/12 PER CASE (APG-88)
