S-87

BLUE GLOSS™ DRESSING

FEATURES AND BENEFITS

BLUE GLOSS™ DRESSING is a high gloss, multi-purpose, exterior dressing that restores and protects rubber, vinyl and plastic. It sprays out smooth and lays down immediately with no crawling, modeling, or runs and spreads evenly when wiped. It is less oily and dries quickly to minimize product "slinging" onto body panels. Blue Gloss™ can be sprayed on wet tires without streaking. Its solvent base formula penetrates the surface, providing a durable, high gloss, weather resistant coating. The special fast drying solvent also buffers against sprayer blow outs. S-87 is blue in color, like most popular solvent dressings with a fruity fragrance that will please the end user.

RECOMMENDED FOR

Use on exterior automotive surfaces such

as tires, rubber moldings and plastic trim. Blue Gloss™ helps prevent drying, cracking, fading and hardening of these materials. Can be used in numerous applications where a vibrant high gloss look is desired.

APPLICATION

Directions: Shake well before using. N.I.O.S.H. approved mask, safety glasses and rubber gloves are recommended while using this product.

Tires: With a sprayer, apply product evenly onto a clean, dry tire. Product lays down immediately with no runs or drips. Leaves a high gloss shine on tire. For less gloss, apply by wiping on with sponge or terry applicator.

Rubber, Plastic & Vinyl: Wipe on pre-cleaned surface with sponge or terry applicator and let dry.

SPECIAL NOTES

Product is flammable. Keep container closed when not in use. Use only in well ventilated area. Not for use on clear plastic (instrument panels), vehicle controls (pedals, grips, steering wheels) or brake discs/drums. Do not drive vehicle immediately after application when tires are wet to avoid unabsorbed product from spinning off tires onto body panels. Solvent base dressing is not recommended for use on engine compartments or interiors. Use a PRO® waterbase dressing like S-71 Clear Rubber Dressing or S-81 Wipe-On™ Vinyl Dressing in these areas. Refer to MSDS for additional protective measures.
