- **Waterbase, Non-Flammable**
- **Dries Quickly to a Non-Tacky Finish**
- **VOC Compliant**

S-89-5 **OUTSHINE™ DRESSING**

FEATURES AND BENEFITS

S-89 Outshine™ is a super thick, high gloss dressing designed for interiors and exteriors. Its non-flammable, waterbase formula wipes on evenly with no milky runs or drips. It dries to a non-tacky, high gloss finish. S-89 softens, brightens and renews faded surfaces of vinyl, rubber and plastic. In addition, Outshine™ contains UV inhibitors to shield out harmful effects of the sun, such as fading, hardening and cracking. The product can be applied to either wet or dry surfaces with excellent results. The thick emulsion is ideal for wiping on surfaces instead of using sprayers. Wiping on dressing is a better method of application, in most instances, because it lays down immediately, so there is no waiting and there is no excess to cause the product to sling off. This produces a quicker, more economical finish. Outshine™ is the perfect dressing to use anytime a super high gloss is desired.

RECOMMENDED FOR

Outshine™ is great for all types of automotive applications. Use on tires, bumpers, moldings, trim, vinyl tops & seats, interior plastic, rubber mats and dashboards. Gives an extra high gloss to everything from rubber, vinyl or plastic. **Ideal for car washes** where tires are not always dry. Excellent product where flammable and combustibles are not allowed and areas that you want to control the gloss levels.

APPLICATION

Directions: Shake well before using. For your protection, safety glasses and rubber gloves are recommended.
Tires: Saturate a sponge or terry cloth applicator with Outshine™ and apply evenly on a clean surface. May also be sprayed on or used with "swabby" style tire dressing applicator.
Rubber, plastic and vinyl: Wipe on pre-

cleaned surface with sponge or terry cloth applicator and let dry. Using a dry cloth, wipe the surface to produce a natural luster.

For Less Gloss: In a separate quart container, dilute 1:1 with water.

SPECIAL NOTES

Not for use on clear plastic (instrument panels), vehicle controls (pedals, grips, steering wheels) or brake discs/drums. Do not drive vehicle immediately after application when tires are wet (Spray Application) to avoid unabsorbed product from spinning off tires onto body panels.
