S-99 GLOSSO™ Vinyl & Rubber Dressing

FEATURES AND BENEFITS

S-99 GLOSSO™ is our most advanced high gloss, waterbase dressing & protectant. This clear blue, rich formulation flows out evenly and dries to a long lasting, very high gloss finish that resists water and the elements. It combines acrylic-hybrid technology with existing polymer chemistry to create a more glossy surface with longer lasting features. It looks and acts like solvent based dressings but it is nonflammable and very environmentally acceptable. Contains a great bubble gum fragrance.

RECOMMENDED FOR

The versatility of S-99 GLOSSO™ leaves little it won't do. As an exterior bumper and tire coating, it is superior. On the interiors, it dresses

all vinyl and plastic with a luster that is radiant. Can be used on vinyl roofs, molding and all rubber parts. It also can be used for final dressing engine compartments.

APPLICATION

Directions: Shake well before using. For your protection, safety glasses are recommended while using this product. On badly weathered and soiled surfaces, pre-clean with C-52 Whitewall Cleaner or C-49 Heavy Duty Interior Cleaner depending on surface.

Tires: Hold sprayer 4" to 6" from tire and spray evenly on a clean, dry surface. Allow 2-3 minutes for runs or drips to dissipate. Dries to a super high gloss. For less gloss, apply with sponge or terry applicator.

Rubber & plastic trim: Wipe on pre-cleaned surface and let dry.

SPECIAL NOTES

Use only as directed. Not for use on or near clear plastic, (instrument panels), vehicle controls (pedals, grips, steering wheels) or brake discs/drums. Do not drive vehicle immediately after application when tires are wet. Wipe off excess material to avoid unabsorbed product from spinning off tires onto body panels. Refer to MSDS for additional protective measures.

PACKAGING

1 GALLON/4 PER CASE
5 GALLON CUBE
55 GALLON DRUM
